

MODEL 2460XP

24" Capacity Horizontal Grinder

The Beast® Model 2460XP will **outperform all other grinders** in its size class. The 2460XP is equipped with a 60" wide by 36" diameter cuttermill, and a 60" wide by 24" mill opening. This machine uses a 30-tooth cuttermill running Bandit's saw-tooth style cutterbodies regulating the size of the tooth's bite. Most of the material is sized in the initial cut, so material exits the large screening area quicker.

BUILT TO OUTPERFORM

A variety of tooth options are available on the 2460XP, ensuring that you can produce the perfect product for your markets. It excels at processing larger diameter material, stumps and chunkwood.

DISCHARGE TO GREAT HEIGHTS

The discharge conveyor makes it easy to load open-top trucks or build large piles of chips and mulch. The two-stage belt conveyor consists of a 42"-wide primary belt that pulls everything from under the mill to the 2 speed secondary belt.

EASE OF ACCESS

The Model 2460XP is maintenance-friendly with easy access to wear items, and simple hydraulic and electrical systems. Screens are simple to change by being pulled from the side of the machine, and ladders, steps and handrails help operators feel secure while climbing and working on the machine. There is easy access to the mill for changing teeth and cutterbodies.

LIMIT DAMAGE FROM CONTAMINANTS

When encountering ungrindable contaminants, The Beast's cutterbodies and teeth are designed to absorb the shock of the blow, protecting the cuttermill and support arms. This limits the downtime for mill repairs to the time it takes to replace teeth and rakers. And the 2460XP, like every other one of The Beast horizontal grinders, has a unique waste gate that makes it easy to quickly remove of any contaminants from the mill and screening area, limiting damage to the mill and wear parts.

Bandit

EMPLOYEE-OWNED

Hand-Fed Chippers • Stump Grinders • Whole Tree Chippers
Horizontal Grinders • Slow-Speed Shredders

COMMITTED TO QUALITY & PRODUCTIVITY

Since 1983, Bandit has manufactured equipment for a multitude of wood waste processing markets. The vision since the beginning, is to build quality, highly productive, easy to maintain equipment providing years of dependable service.

The commitment for quality, innovation and dedication is instilled in every employee and is one of the main reasons why Bandit became an Employee-Owned Company (ESOP) in 2018. These core values ensure each Bandit machine will leave the factory ready to exceed your expectations.

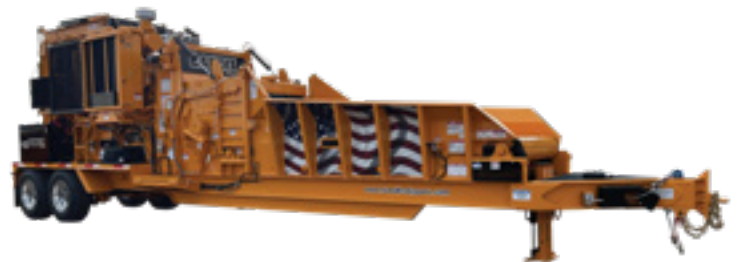

GO-ANYWHERE TRACK MOBILITY

Caterpillar steel track undercarriage can be added to the 2460XP. This feature allows it to travel over rough terrain not accessible by towable units. It also eliminates the need to forward or skid material to the 2460XP – the operator can take the grinder to the trees.

TEST OUR METAL

When you choose The Beast® Horizontal Grinder, you'll experience more uniform chip production, smoother and more efficient chipping, long-lasting components and improved fuel economy. We invite you to see for yourself by scheduling a demo with your nearest authorized Bandit dealer.

Bandit Offers a Complete Line of Tree Care Equipment:
Hand-Fed Chippers • Stump Grinders • Whole Tree Chippers
Horizontal Grinders • Slow-Speed Shredders
