

RDS-15

Portable Horizontal Shaft Impact (HSI) Crusher

CRUSHER

IROCK'S RDS-15 closed-circuit, Portable Horizontal Shaft Impact (HSI) Crusher offers rapid set-up time and exceptional portability. This versatile plant is ideally suited for asphalt recycling applications, but it also effectively and efficiently crushes materials such as rock, gravel and slag. And with the ability to easily return two decks to the crusher, the RDS-15 is an excellent choice to increase project output.

Engine	CAT® C9.3B 415 HP
Top Deck	14 feet x 5 feet
Bottom Deck	14 feet x 5 feet
Feeder Size	40 inches x 14 feet
Rotor Size	40 inches x 43 inches
Weight	97,940 pounds

1 IROCK's four-bar rotor 4043 impactor design produces a consistent, uniform cubical product.

2 The RDS-15's on-board power source runs the complete operation as well as three auxiliary outlets.

3 Ability to return top and bottom deck oversized material back to the crusher. This feature increases production by splitting the load on two decks rather than one.

Closed-circuit design with a four-bar impactor offers exceptional durability and efficiency for producing uniformly sized product.
